OPERATOR CAB:

The large, heavy duty, flat-deck operator's cab is mounted as a separate unit on rubber mounts to reduce noise, vibration and heat. Pressure gauges mounted on the control panel allow the operator to continually monitor the machine load. The front windows of the cab are made of tempered glass providing unobstructed vision and safety. The side windows are covered with laser cut metal screens for ventilation (air conditioned cabs include tempered glass on the side windows).

COOLING SYSTEM :

A self-cleaning cooling system mounted at the rear of the machine contains three radiators for the following:

- Engine coolant
- Hydraulic oil
- AC condenser

A maintenance free, automatic dust vacuum system removes and discharges debris before it gets to the radiators to ensure constant operation under normal working temperature.

SAFETY:

In the design, components selection, and manufacturing, as well as in the servicing and operating instructions, much thought has been given to providing a machine with high productivity, low maintenance, long life, and above all operator safety.

LITERATURE:

Each unit is supplied with full documentation for all systems. This includes a "General Safety and Operations Manual" and a "Specifications and Spare Parts Manual".

FINISH:

- Machine parts are sand blasted, primed and painted.
- Machine bolts are zinc plated, grade 5.
- Saw blade propelling and rotation parts (pulleys, shafts, washers, etc.) are zinc plated.
