Pruning tower

The Afron SA2000 was designed to meet the growing demand for a compact, versatile manlift. More than 35 years of experience in the ag market went into this simple, stable machine. Originally created for nursery maintenance, the SA200 maneuvers easily through tight spaces. The SA200 is also great in the orchard for picking, pruning and thinning. However, the uses for this kind of narrow man lift are many. In fact, the SA200 would be well suited to any application where mobility is necessary and space is limited.

Specifications:

- Working Height: 15ft
- Platform Height: 10ft
- Platform Load Capacity: 330 lbs
- Engine: Kohler Gas Standard, Lombardini Tier 4 Diesel Optional.

*All dimensions are approximated.
