# HS900W

## Skirter

www.tol-inc.com

The HS900W kit is designed to perform mechanical topping, hedging and skirting. This is one of our most versatile kits, well suited to citrus, nut and deciduous trees and an excellent choice for skirting. The HS900W is designed to cut branches up to 2 inches in diameter

The HS900W Kit was designed with the small to medium sized grower in mind. The kit can be mounted on their tractor during the pruning season and then removed once the pruning is complete. This allows the owner to use the tractor for other applications throughout the year.

### Specifications:

- Cutting Pass: 9ft
- Min Flat Skirting Height: 2ft
- Max Flat Topping Height: 14ft
- Max Hedging Height: 23ft 7in
- Three 24in Diameter Saw Blades
