Dual Boom Hedger Topper

The HDR1100N T4 was designed to meet the growing demand for a dual boom, topper hedger able to hedge as narrow as 2 feet. The unique design of the machine allows each boom to be moved independently of each other making the HDR1100N T4 one of our most versatile and productive machines to date. The "walking beam" rear axle of the HDR1100N T4 provides a stable ride over berms when cross hedging. The narrow power unit with its low profile tires provide for efficient hedging in the tightest planted orchards.

Specifications:

- Cutting Pass (Per Side): 11ft
- Min Hedging Width: 2ft
- Max Hedging Width: 13ft
- Max Hedging Height: 28ft
- Max Flat Topping Height: 20ft
