Fixed Boom Topper Hedger

TCL INCORPORATED

The TH2000F T4 Fixed Boom Topper Hedger represents our continued commitment to meet the needs of our customers. The design features of the TH2000F T4 were requested by pecan growers in the Southwest region of the United States.

The TH2000F T4 features our Direct Drive system which eliminates the need for belts to drive the saw blades. This results in easier maintenance and increased reliability.

We also included larger blades and created a 24' cutting path because growers wanted to cut more efficiently in their pecan orchards.

Specifications

- Cutting Pass: 24ft
- Max Hedging Height: 51ft 8in
- Max Flat Topping Height: 31ft 6in
